

# Developer Experience at Bridge

Presenter: Kevin Lee

Advisor: Dr. Bill Erdly

## Objective

The main objective of this internship was to focus on enhancing the developer experience by leveraging the capabilities of Depot, and creating a “god” mode to boost Bridge administrators ability to proactively address potential bugs as different users.

## Benefits

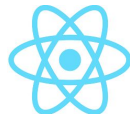

Depot:

- Faster build times of Docker images.
- Cloud accelerated builder
- Cache as a team

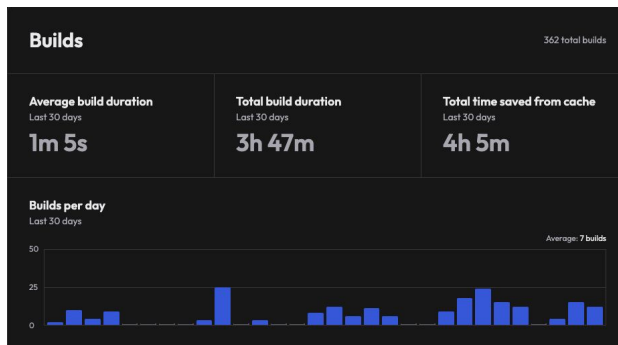

“god” mode:

- More immersive approach to testing.
- Cloud accelerated builder
- Cache as a team

## Technologies

## Results

## Methodlogy

Depot:

- Read Depot Documentation.
- Change authentication to OpenID (OIDC) with GitHub.
- Reorder dependencies and utilize depot methods.

“god” mode:

- Create an api requests for getting the list of users and one to change the current user token.
- Structure the response from the api requests.
- Implement front-end.
